DECEMBER 2025

FORWARD LOOKING STATEMENT

This presentation contains “forward-looking information” (within the meaning of applicable Canadian securities laws) and “forward-looking statements” (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995). Such statements or information are identified with words such as “anticipate,” “believe,” “expect,” “plan,” “intend,” “potential,” “estimate,” “propose,” “project,” “outlook,” “foresee,” or similar words suggesting future outcomes or statements regarding an outlook, and include statements regarding the planned preparation of a NI 43-101 Technical Report on the Company’s Loveland Property and the proposed work on the projects. Factors that could cause actual results to differ materially from such forward-looking information include, but are not limited to, the Company’s inability to complete the financings necessary to complete proposed work and preparation of the Technical Report, failure to identify mineral resources, failure to convert estimated mineral resources to reserves, the inability to complete a feasibility study which recommends a production decision, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental, or other project approvals, political risks, inability to fulfill the duty to accommodate First Nations and other Indigenous peoples, uncertainties relating to the availability and costs of financing needed in the future, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects, capital and operating costs varying significantly from estimates, and other risks involved in the mineral exploration and development industry, capital market conditions, restrictions on labour and international travel, and supply chain issues, as well as those risks set out in the Company’s public documents filed on SEDAR+. Although the Company believes that the expectations reflected in the forward-looking information or statements are reasonable, prospective investors in the Company’s securities should not place undue reliance on forward-looking statements because the Company can provide no assurance that such expectations will prove to be correct. Forward-looking information and statements contained in this news release are as of the date of this news release, and the Company assumes no obligation to update or revise this forward-looking information and statements except as required by law.

An additional cautionary note to investors – In the event that we use certain terms in this presentation, such as “resource”, “measured resource”, “indicated resource” and “inferred resource”, U.S. investors are cautioned that, while such terms are recognized and required by Canadian securities laws, the United States Securities and Exchange Commission does not recognize them. Under U.S. standards, mineralization may not be classified as a “reserve” unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination has been made. U.S. investors should not assume that all or any part of measured or indicated resources will ever be converted into reserves. In addition, “inferred resources” have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Accordingly, information concerning descriptions of mineralization in this presentation may not be comparable to information made public by companies that are subject to the SEC’s Industry Guide 7.

Some of the potential quantities and grades disclosed are conceptual in nature, there has been insufficient exploration to define a mineral resource on all of the mineralization at the mineral property, and it is uncertain if further exploration will result in certain targets being delineated as a mineral resource.

Curtis Ferron, P.Geo. (ON), independent consultant for Loyalist, who is a “Qualified Person” as defined by NI 43-101, has reviewed and approved the technical content of presentation

PURPOSE

"Buy Timmins" reflects our commitment to the city where Loyalist Exploration was founded, where many of our shareholders live, and where over a century of mining has produced more than 80 million ounces of gold. **Timmins offers exceptional geology**, 10–20 million ounces of gold still in inventory, and landmark operations like Kidd Creek, the world's deepest base-metals mine. When you invest in Timmins mining, Loyalist is your gateway, and our mission is to continue developing the region's best assets with the people and businesses who make Timmins a global mining hub.

A NEW COMPANY FOCUSED ON

GOLD, COPPER & NICKEL IN TIMMINS

LOYALIST EXPLORATION
BUY TIMMINS

WHY GOLD?

- Record high prices
- Strong long-term demand
- Hedge against inflation & currency debasement
- Strong leverage for juniors to rising gold prices
- Goldman Sachs sees gold hit $4,900/oz by Q2 2026

WHY TIMMINS?

- Historic 70M oz gold camp
- Solid infrastructure
- Skilled workforce
- Potential for new discoveries
- Mineral endowment – gold & base metals
- Easily accessible year-round
- Cost effective exploration

WHY LOYALIST?

- Diversified portfolio – Gold, Copper & Nickel
- Prime location – located along the Porcupine–Destor and Pipestone Faults
- Near term production
- Tightly held share structure
- Experienced local management and advisors

Au
TULLY

- Targeting production within two years
- Gold project with multiple high-grade gold intercepts in drill core
- +$20 mil. spent on drilling completed, data available
- 144,000 oz historic non-NI 43-101 compliant historical resource, mineralization remains open

Au
DESANTIS

- Over 87,000 metres drilled, several zones open for resource expansion and new discoveries
- Top historic intercepts include 13.8 g/t Au over 2.5 m and 3.37 g/t Au over 21.9 m

Au, Cu, Ni
LOVELAND

- High-grade copper and nickel non-NI 43-101 compliant historical resource of +500,000 tonnes defined in two zones, previously part of two separate companies now in one large project
- +10 g/t high-grade gold in core and surface showings have never been followed up

Au
GOLD RUSH

- Potential extension of known gold trend
- Best historic drill intercept 2.08 g/t gold and 11.5 g/t silver over 1 metre.
- Historic surface grab samples up to **27.3 g/t** and **11.2 g/t** gold

BUY TIMMINS

ACQUIRED

TULLY

- Cash payment of $500,000 and the issuance of 78,972,740 common shares to Fulcrum Metals
- 2.0% NSR, with a 1% buy-back option for $1 million
- Additional milestone payments to Fulcrum Metals (see press release dated April 9, 2025)

ACQUISITION PENDING

DESANTIS

- *Cash payment of $100,000 and the issuance of $400,000 in common shares to the vendor*
- *Milestone payments and royalites with buyback option (see press release dated December 1, 2025)*

ACQUIRED

LOVELAND

- Cash payment of $250,000 and the issuance of 10,000,000 common shares to STLLR Gold
- 2.0% NSR, with a 1% buy-back option for $1 million (see press release dated June 30, 2025)

OPTIONED

GOLD RUSH

- Cash payments of $160,000 (over 3 years) and the issuance of 20,500,000 common shares to private prospector
- 2.0% NSR, with a 1% buy-back option for $1 million (see press release dated April 1, 2025)

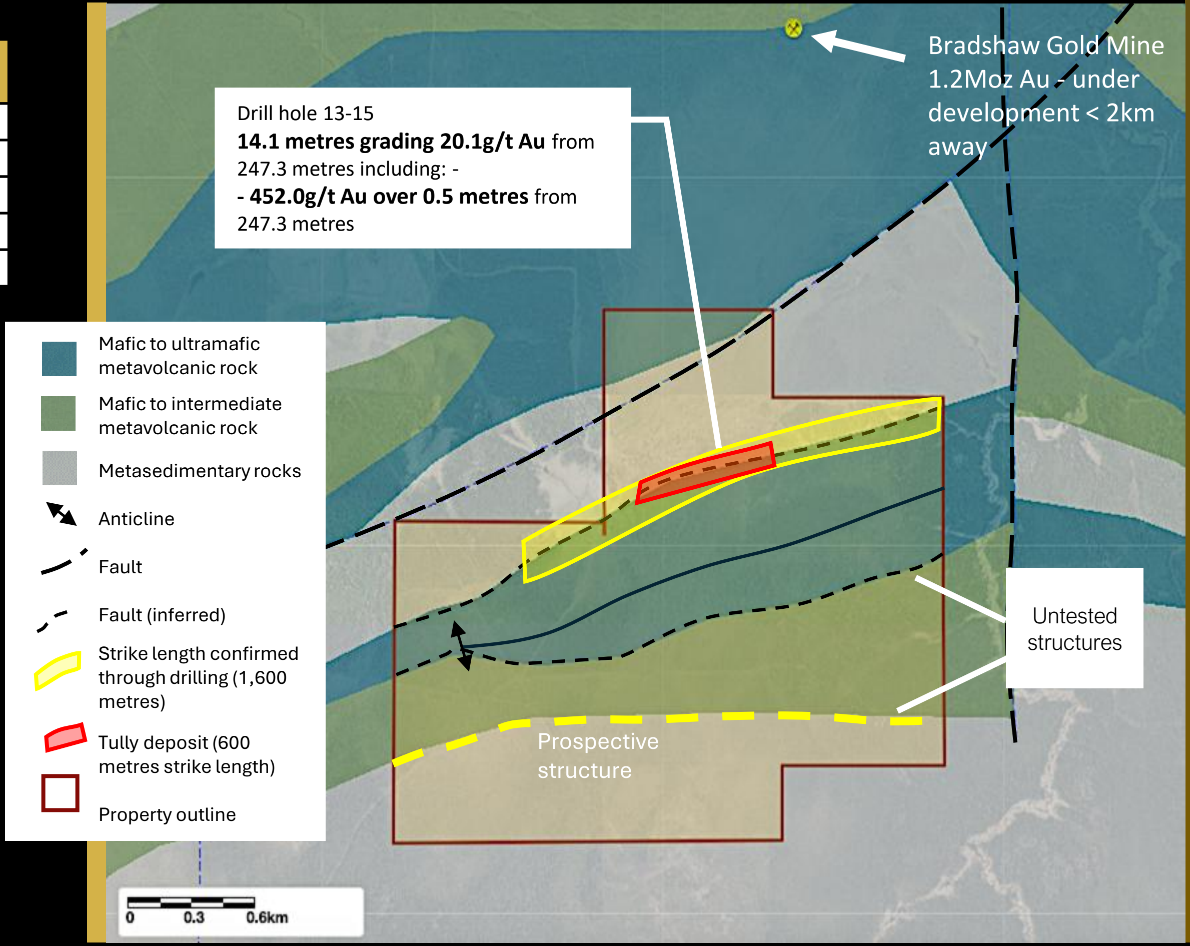
SGX December 2013, non-NI 43-101 Compliant Historical Internal MRE*

Model	Category	Tonnes (*1000)	Grade (Au g/t)	Ounces Au
Capped	Indicated	358	6.56	76,000
Capped	Inferred	184	5.17	31,000
Uncapped	Indicated	362	8.70	101,000
Uncapped	Inferred	186	7.17	43,000

- Historic drilling has confirmed gold mineralization along 400 metres of a 1,600-metre strike length, with assay grades capped at 70 g/t above a resource cut-off of 2.5 g/t
- Historic 1969 drill holes, such as hole 6906A with results like 28.8 g/t over 4.5 metres, have been excluded from the resource estimate
- High-grade assays were obtained in 1997, with intervals such as 2,555 g/t Au over 0.5 metres (Hole 97-01)
- Expansion opportunity along strike and depth – SGX Resources 2013 step-out drill results showed eastern extension:
  - Hole SGX13-07: 9.01 g/t Au over 6.7 metres starting at 104.25 metres downhole
  - Hole SGX13-15: 36.7 g/t Au over 6.3 metres starting at 247.3 metres downhole
  - Hole SGX13-09: 8.0 g/t Au over 6.5 metres starting around 600 metres depth downhole



NEXT STEPS:

Commencement of Mining Permit

Resource Estimate

Preliminary Economic Assessment

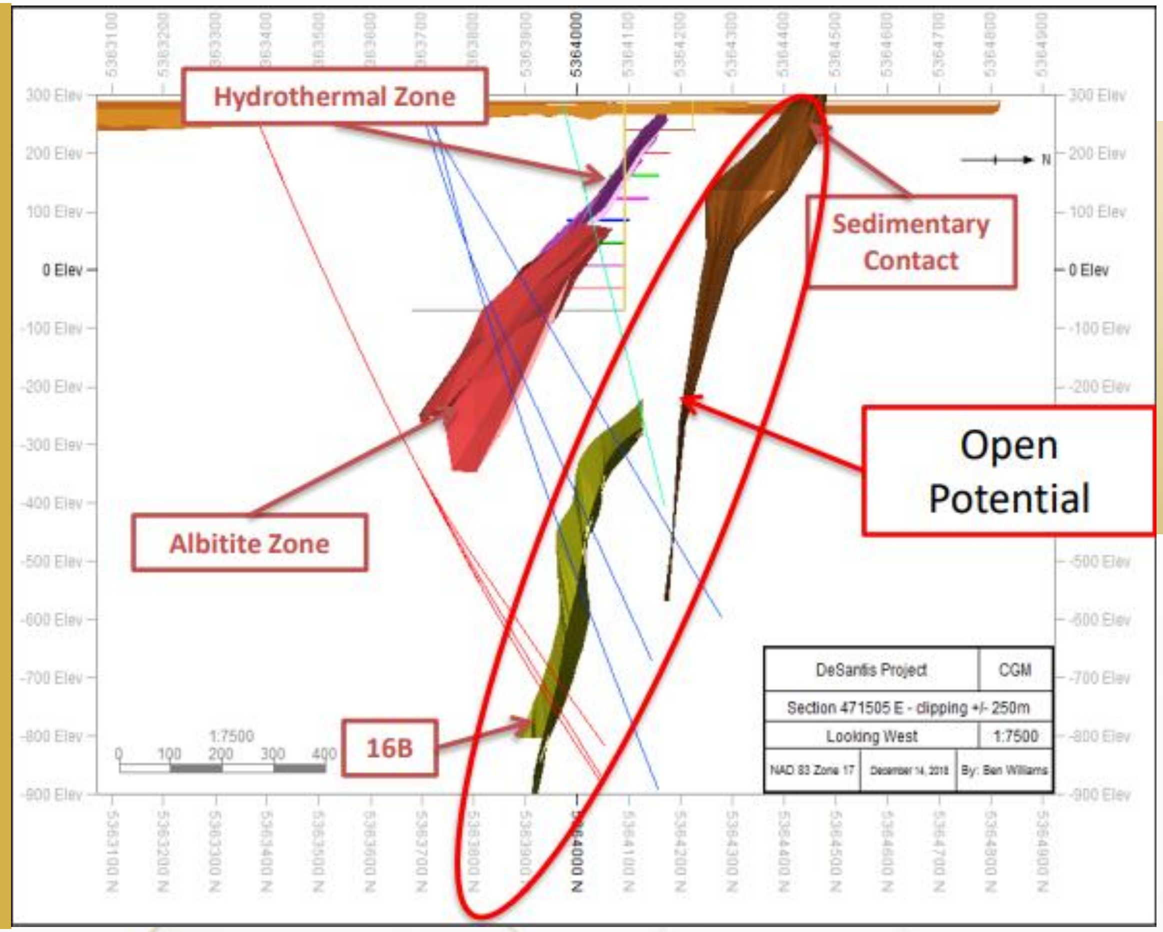
Expansion Drilling

Production

*Notes:
1. CIM Definitions were followed for classification of Mineral Resources.
2. Mineral Resources are estimated at a cut-off grade of 2.5 g/t Au.
3.Mineral Resources are estimated at a gold price of $1,510 and a metallurgical recovery of 92%.
4. High grade assays are capped at 70 g/t Au.
5. Bulk density of 2.71 t/m3 as used.
6. Numbers may not add due to rounding.

DESANTIS

Several Zones Open for Resource Expansion and New Discoveries



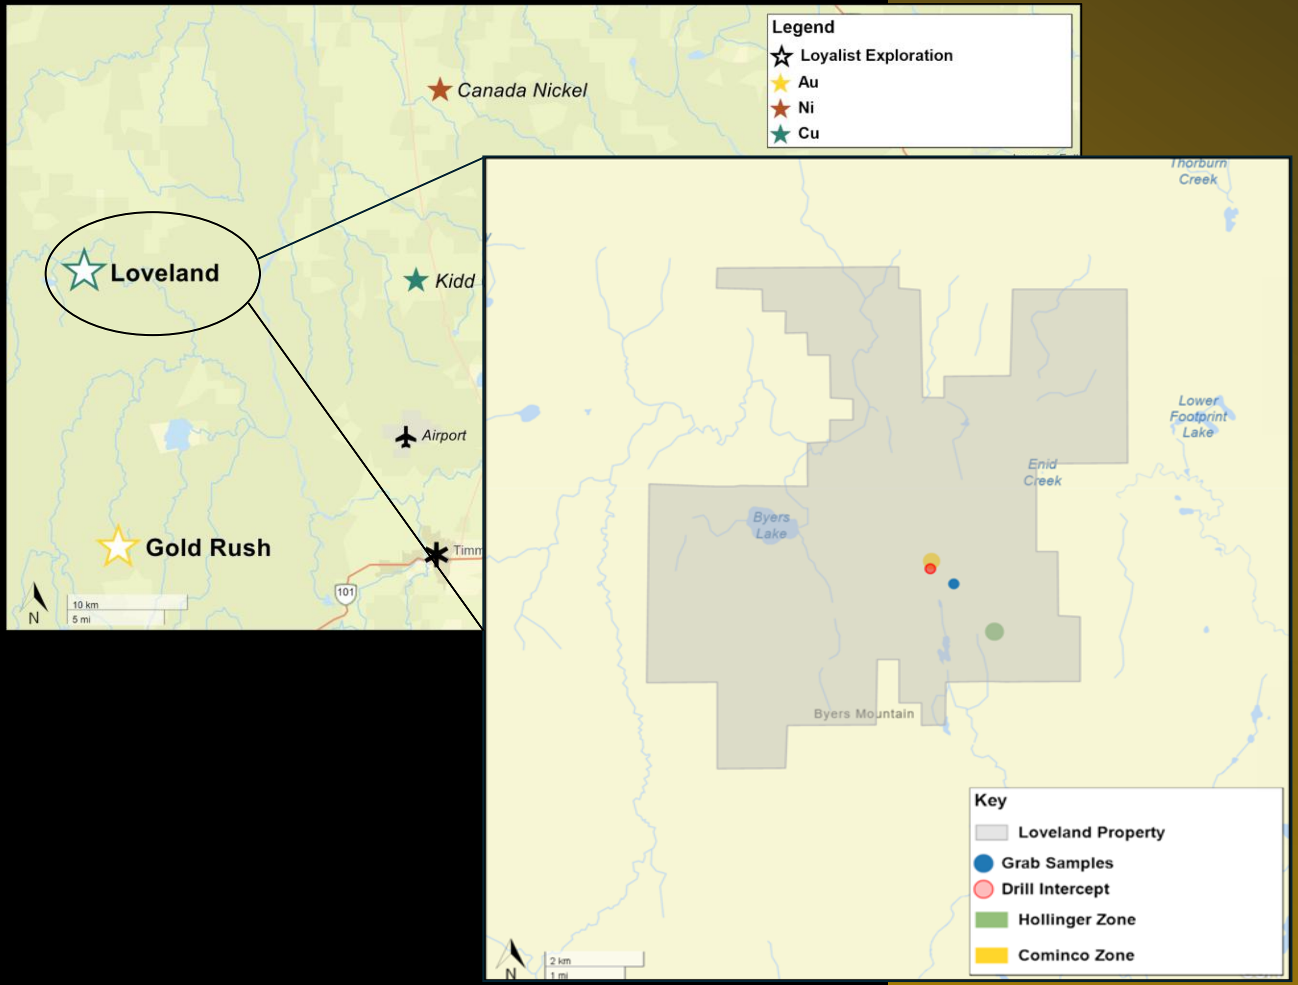
- 915 hectares
- SE of Timmins, with good access off highway
- Hosts the past producing DeSantis Mine, which produced ~200,000 tonnes grading 5.89 g/t (1939 – 1942)
- 1,244-foot shaft with 9 underground levels
- Four gold zones remain open for expansion:
    - Hydrothermal Zone (HTAZ) – 34,307 oz Au at 9.09 g/t [1]
    - Albitite Zone – 16,588 oz Au at 7.85 g/t [1]
    - Sedimentary Contact Zone
    - 16B Zone
- Mineralization may be Cigar shaped orebodies as mined in Timmins-Porcupine Gold Camp

[1] 43-101 NON compliant MRE

Loyalist Exploration
Buy Timmins

LOVELAND

High-Grade Gold, Copper and Nickel Exploration



- ✓ Located 35 km NW of Timmins, in the world-renowned Abitibi Greenstone Belt
- ✓ Property covers 6,244 hectares across 292 mining claims
- ✓ Hour drive from Timmins via Highway 101, providing reliable seasonal access

Ni/Cu

- Hollinger Zone - **422,350 tons - 0.71% Ni and 0.42% Cu.** [1]
- Cominco Zone - **130,000 tons - 0.73% Ni and 0.68% Cu.** [1]
- Open along strike and at depth
  - *9,353 metres of drilling (33 drill holes) into the Cominco Zone over a 150-metre strike length, to a depth of 492 metres is not included in the historic resource and could add significant tonnage*

Au

- Gold assays in drill core:
  - **6.37 g/t Au over 8.5m at 383.25m**
  - **6.17 g/t Au over 3.0m at 403.0m**
  - **10.39 g/t over 3.1m at 410.30m**
- **11.48 g/t Au** in surface outcrop 400 m south or the Cominco Zone

[1] Historical Non-43-101 compliant resources

LOVELAND *Continued...*

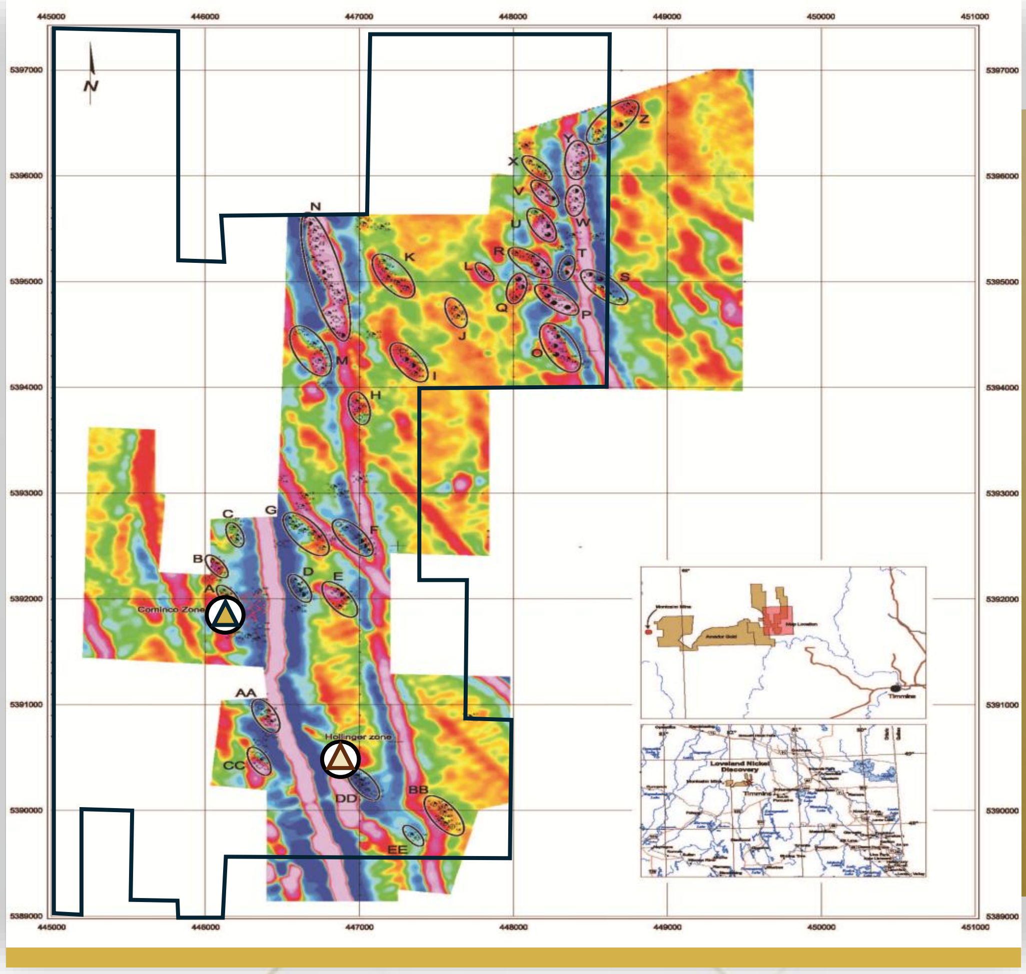
HOLLINGER ZONE

- Multiple anomalies untested
- No significant work since 1970's

COMINCO ZONE

- Multiple anomalies untested

Property Boundary
Hollinger Zone
Cominco Zone



Deposit Characteristics:

- Multiple massive sulphide lenses along the western contact between gabbro dykes and felsic-int volcanics.
- 345/85 Strike/Dip, S plunge at 60 degrees.
- 125 metres long, 16 metres max width for a lens (LV-21).
- 240 metres deepest intersection (LV-21).
- **Isopach map suggests it is open down plunge along strike (southward) and becomes thicker with depth.**
- OVBN at 40 metres.

Geophysics

Multiple untested targets northeast of Hollinger Zone.

2007-2009 work program:

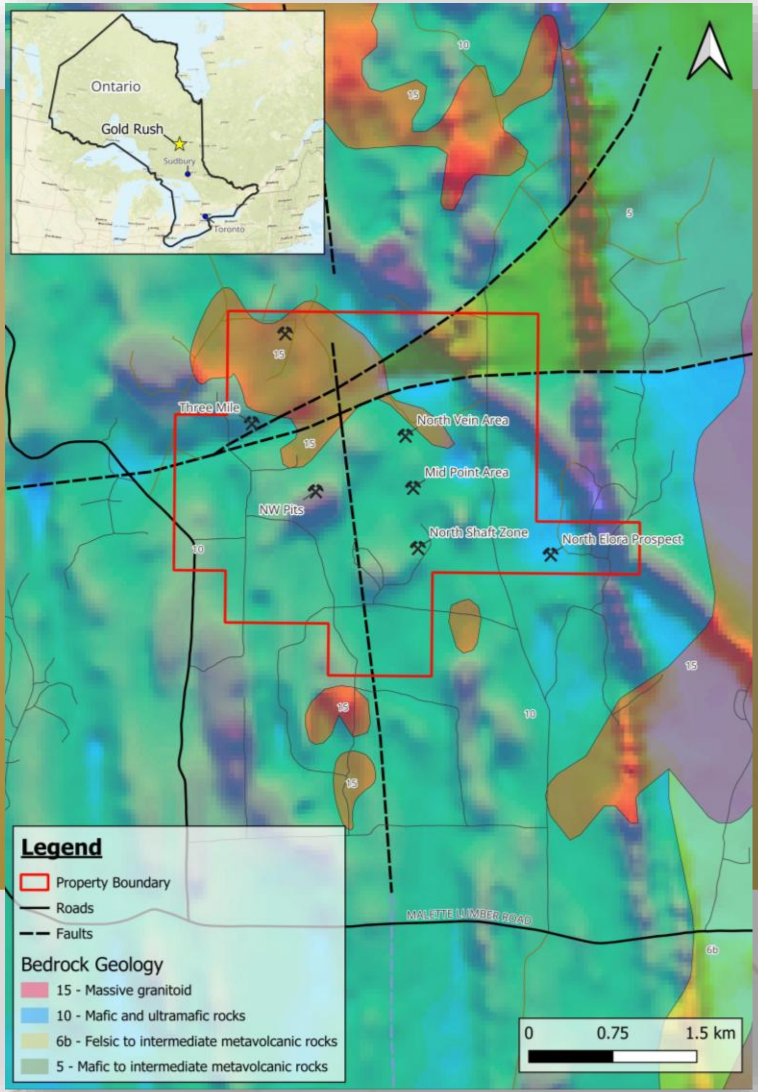
- Airborne EM survey 50m spacing
- 32 anomalies.

NEXT STEPS:

1. Complete Property Review
2. Focused Geophysics
3. Drill Program

GOLD RUSH

Potential Extension of Known Gold Trend



- Property less than 30 km from Timmins, Ontario
- 41 contiguous cells covering 877 hectares
- Assessment credits in reserve – excess of 10 years
- Three high priority prospects:
  - North Shaft Zone
  - North Vein Area
  - Mid Point Area
- 16 completed drill holes
  - Best assay: 2.08 g/t Au and 11.5 g/t Ag over 1 metre
- 11 grab samples returned >1 g/t Au, with high values of 4.93, 8.88 and 27.3 g/t Au
- Potential for property expansion and extension of known gold trend

NEXT STEPS:

Focused Geophysics

Field Mapping and Prospecting

Drill Program

ERROL FARR, CPA

PRESIDENT AND CEO, DIRECTOR

Mr. Farr is a seasoned mining and financial professional with over 35 years of experience in financial management and reporting, operations, business optimization and strategy development. He is the former CFO of Anaconda Mining Inc., a gold producer in Newfoundland. Former CEO of Adex Mining Inc., a polymetallic mineral project in New Brunswick and former CFO of MagIndustries, potash, magnesium, hydro, forestry and oil in the Republic of Congo. He is CFO of Big Tree Carbon Inc., with bio-diversity and mining opportunities near Red Lake, Ontario, CFO and Corporate Secretary of AFR NuVenture Resources Inc., a mining projects in Timmins and Cape Breton and Corporate Secretary of Homeland Nickel Inc., nickel projects in Oregon.

ASHLEY NADON, CPA

CHIEF FINANCIAL OFFICER

Ashley Nadon is a chartered professional accountant (CPA) and holds a BA (Economics) degree from the University of Toronto, and an MBA from McMaster University. Mrs. Nadon provides consulting and accounting services to private and public companies in her role as Managing Director of a firm of chartered professional accountants. Mrs. Nadon has experience as the CFO of several Reporting Issuers and is also the CFO of Homeland Nickel Inc.

OUR TEAM

Directors

MICHAEL CACHIA, CPA

INDEPENDENT DIRECTOR

Michael Cachia is a Chartered Professional Accountant with an extensive history of providing services to entities in the natural resource sector and he is a partner in a Toronto based firm of Chartered Professional Accountants. Michael will serve as the Audit Committee Chairman. He is a director and the audit chair of Enerev5 Metals Inc. He is also a director of Western Kidd Resources Inc., a private mineral exploration company located in the Timmins camp.

ROBERT BRESEE

INDEPENDENT DIRECTOR

Bob Bresee, CET, is the chief executive officer of Voltage Metals Inc., a certified engineering technologist and graduate of the Haileybury School of Mines and has 45 years in the mining business and a long-time resident of Timmins, Ontario. Mr. Bresee's experience includes project operating/management, engineering -- specializing in junior mining operations, project evaluation, project budgeting/mine planning/cost control. Experienced in narrow vein mining and the permitting process in Ontario. Mr. Bresee is the former project manager on the company's prospective Tully project.

DAVID DRINKWATER

INDEPENDENT DIRECTOR

David Drinkwater has extensive business and legal experience across many industries with a broad focus including corporate finance and mergers and acquisitions and acting as a board member of various public companies. He was Chairman of Loyalist from June 2019 to December 2023.

OUR TEAM

Advisors

JEAN ROY

INDEPENDENT ADVISOR

Jean Roy is a former business advisor to “Pelangio Larder Mines” in the acquisition and formation of the Detour Lake gold deposit, a multi-million-ounce gold producer in Ontario, Canada. He was also a former advisor to Richfield Ventures Inc. during the discovery of the Blackwater gold deposit in British Columbia, Canada. He is a native of Timmins, Ontario, Canada.

KEVIN FILO

INDEPENDENT ADVISOR

Kevin Filo is a founder, Director and the Corporate Secretary of Mink Ventures Corporation (TSXV: MINK), a Timmins based nickel, copper, cobalt explorer. Mr. Filo obtained an Honours Bachelor of Science (HBSc, 1980) degree in geology from Laurentian University in Sudbury, Ontario, and has been professional geologist for over 35 years. Mr. Filo is President of Filo Exploration Services Limited, a private geological consulting firm, established in 1983. Over the last fifteen years Mr. Filo also acted as President and Vice President of a number of successful private exploration project generator companies. From December 2018 until April 2022 Mr. Filo was VP Corporate Development for Pelangio Exploration and prior to this he was part of the Pelangio Mines Inc. acquisition team that acquired the former Placer Dome Canada Detour Lake Mine on Pelangio’s behalf. This project eventually became an established Canadian gold producer now operated by Agnico Eagle Mines.

BIRKS BOVAIRD

INDEPENDENT ADVISOR

Birks Bovaird is the Chair of the board of Energy Fuels Inc., a leading U.S. based critical minerals company primarily known for its uranium mining operations, but it’s also involved in rare earth elements (REEs) and heavy mineral sands production. He is also a director of Noble Mineral Exploration Inc. The dominant focus of Mr. Bovaird’s career has been the provision of corporate financial consulting and strategic planning services. He has previously been involved with, and is currently involved with public resource companies, both in management and as a director, and was formerly the Vice President of Corporate Finance for one of Canada’s major accounting firms. He holds an ICD.D designation and is a graduate of the Canadian Director Education Program.

STEPHEN BALCH, P.GEO.

INDEPENDENT ADVISOR

Stephen Balch is an Ontario registered geoscientist with over 38 years' experience as a geophysicist. Steve’s background includes nickel, copper and platinum group element exploration where he has worked with Inco Limited and FNX Mining in the Sudbury Basin, and Voiseys Bay Nickel in Labrador. Steve has over 20 years' experience with public company management and has served as President, CEO, technical consultant and director of various exploration companies. In 2001 Steve joined Aeroquest Limited and helped develop the AeroTEM system, the first commercial helicopter time domain EM system, helping take the company public in 2004. In 2019 Steve co-founded Canada Nickel Company Inc. and is currently VP Exploration. Steve is also President and CEO of Homeland Nickel Inc.
